

NOTES FOR EXERCISES IN SESSION 10

* GO Problem 16.3, 16.4/exam2008:1, 16.2 (VER: 20, 22)

Schedule today:

- review of 2nd worked split-plot example (L10–8,9),
- additional remarks on random effects models and split-plot designs (L10–10),
- you work on the exercises on your own.

Other news:

- perhaps discussion of projects and earlier home assignments,
- 3rd home assignment posted at the homepage.

Notes on the software:

- see overview for lab session 9,
- solution files for all packages for add10: 2, 3, 4.

What you should be able to do after today's session...

- recognise hierarchical and/or split-plot data structures in experimental designs,
- construct ANOVA table outlines for and analyse basic, balanced random effects designs.
