

NOTES FOR EXERCISES IN SESSION 10

- * add10:4; GO Problem 16.4/exam2008:1 (p. 444); GO Problem 16.3 (p. 444), 16.2 (p. 443) (VER:20; add10:1)

Schedule today:

- review of 4th home assignment (GO Problem 13.8),
- additional remarks on random effects models and split-plot designs (L10–7/8/10),
- discussion of your project proposals,
- you work on the exercises on your own; software notes: look at overview for lab session 9 and solution files.

Other news:

- 3rd/5th home assignment now posted at the homepage; — the due deadline (March 30th) is *not* flexible.

What you should be able to do after today's session...

- recognise hierarchical and/or split-plot data structures in experimental designs,
- construct ANOVA table outlines for and analyse basic, balanced random effects designs.
